DETAILED ACTION

Applicant's amendments and remarks in filed 5/27/03 and 10/21/03, are acknowledged. Canceled claim 29, thrice amended claim 17, twice amended claims 11 and 12, once amended claims 38 and 39, and new claims 40-46 are acknowledged.

Applicant's arguments, filed 5/27/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from the previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 1, 8, 11-12 (twice amended), 13, 17 (thrice amended), 18-19, 38 (amended), 39 (amended), and 40-46 (new) are herein under examination.

Specification

The objection to the disclosure is maintained because it contains embedded hyperlinks and/or other forms of browser-executable code, such as on page 39, lines 4 and 14, and page 18. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01. Please test these hyperlinks on a web browser to make certain they are no longer active.

Claim Objections

Claim 41 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 40 recites “about 2.0X SSC” whereas dependent claim 41 recites “at least 2.0X SSC” which is broader in scope than claim 40.

This objection is necessitated by amendment.

Claims Rejected Under U.S.C. § 112, First Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

LACK OF WRITTEN DESCRIPTION

The rejection of claims 1, 8, 11-13, 17-19, 38, and 39 is maintained and newly applied to claims 40-46 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This rejection is maintained (for claims 1, 8, 11-13, 17-19, 38, and 39), necessitated by amendment (for claims 40-46), and reiterated for reasons of record.

The specification discloses SEQ ID NO: 4639 which corresponds to DNA encoding a protein of SEQ ID NO: 11926. SEQ ID NOs: 4639, its full-length complement, and 11926 meet the written description provisions of 35 USC 112, first paragraph. However, claims 1, 8, 11-13, 17-19, 29, 38, and 39 are directed to encompass gene sequences, sequences that hybridize (claim 40) to SEQ ID NO: 4639. None of these sequences meet the written description provision of 35 USC 112, first paragraph. Due to the open claim language wording of "comprising" and "comprises" as cited in claims 1 (line 2), 11 (line 2), 17 (line 2), claim 40 (lines 2 and 3), and 43 (line 2); "having" of claim 17 (line 1) and claim 43 (line 3) and claim 44 (line 2); and "has" as cited in claims 38 (line 2) and 39 (line 2); these claims and any dependent claims therefrom encompass gene sequences that do not meet the written description provision of 35 USC 112, first paragraph. The specification provides insufficient written description to support the genus encompassed by the claim.

Vas-Cath Inc. v. Mahurkar, 19 USPQ2d 1111, makes clear that "applicant must convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of the invention. The invention is, for purposes of the 'written description' inquiry, *whatever is now claimed*." (See page 1117.) The specification does not "clearly allow persons of ordinary skill in the art to recognize that [he or she] invented what is claimed." (See Vas-Cath at page 1116.)

With the exception of SEQ ID NO: 4639 and 11926, the skilled artisan cannot envision the detailed chemical structure of the encompassed polynucleotides and/or proteins, regardless of the complexity or simplicity of the method of isolation. Adequate written description requires more than a mere statement that it is part of the invention and reference to a potential method for isolating it. The nucleic acid itself is required. See Fiers v. Revel, 25 USPQ2d 1601, 1606 (CAFC 1993) and Amgen Inc. V. Chugai Pharmaceutical Co. Ltd., 18 USPQ2d 1016. In Fiddes v. Baird, 30 USPQ2d 1481, 1483, claims directed to mammalian FGF's were found unpatentable due to lack of written description for the broad class. The specification provided only the bovine sequence.

Finally, University of California v. Eli Lilly and Co., 43 USPQ2d 1398, 1404, 1405 held that:

Art Unit: 1631

...To fulfill the written description requirement, a patent specification must describe an invention and do so in sufficient detail that one skilled in the art can clearly conclude that "the inventor invented the claimed invention." *Lockwood v. American Airlines, Inc.*, 107 F.3d 1565, 1572, 41 USPQ2d 1961, 1966 (1997); *In re Gosteli*, 872 F.2d 1008, 1012, 10 USPQ2d 1614, 1618 (Fed. Cir. 1989) (" [T]he description must clearly allow persons of ordinary skill in the art to recognize that [the inventor] invented what is claimed."). Thus, an applicant complies with the written description requirement "by describing the invention, with all its claimed limitations, not that which makes it obvious," and by using "such descriptive means as words, structures, figures, diagrams, formulas, etc., that set forth the claimed invention." *Lockwood*, 107 F.3d at 1572, 41 USPQ2d at 1966.

Therefore, only SEQ ID NO: 4639, its full-length complement, and nucleic acids specifically encoding 11926 but not the full breadth of claims 1, 8, 11-13, 17-19, and 38-46 meet the written description provision of 35 USC 112, first paragraph. The species specifically disclosed are not representative of the genus because the genus is highly variant. Applicant is reminded that Vas-Cath makes clear that the written description provision of 35 USC 112 is severable from its enablement provision. (See page 1115.)

Applicants argue that their specification fully supports the sequences encompassed with the claims containing open claim language, such as "comprising", "comprises", "having", and "has". This is found unpersuasive as the specification does not list or adequately disclose the other possible sequences encompassed by these claims except for SEQ ID NO: 4639, its full-length complement, and nucleic acids specifically encoding SEQ ID NO: 11926.

Conclusion

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
